HOW BIG A DANCE FLOOR DO I NEED?

Major dance floor manufacturers specify 3.00--400-SF (square feet) of dance floor for each person dancing on the floor at one time, with 30%-70% of attendees on floor at any time. Our quotes contain 1.50--1.75-SF per attendee unless you request differently. This range works for nearly all events. We'll calculate this for you automatically!

Any of Amerevent's weatherproof parquet, marble or lighted dance floors can be quickly modified to a "black light" dance floor. Hear the awe of your guests as the main lights go down and the black lights turn on! Combine with a dance floor pattern generator to provide an incredibly unique, high-end dance experience at a much lower cost than lighted or video dance floors. Black light fixtures are fully remote controlled and can be and turned on and off throughout your dance evening for different songs and effects. Cost depends upon size but normally a few hundred dollars over that of the dance floor.

TRADITIONAL PARQUET DANCE FLOORS. INDOOR AND OUTDOOR.
