

## MECHANICAL HUMAN ROULETTE

The **MECHANICAL HUMAN ROULETTE** will bring all your guests into the action! It's another great option to the mechanical bull. The rider tries to hold on for 30 seconds as the ride rotates, pitches and yaws before releasing the ball into the giant numbered roulette wheel. Who knows where it will land! Difficulty is a less than a bull and it is an all-ages ride. The package includes a **BRANDABLE** body and the standard mechanical ride motor base set.

Available with a roulette betting table and betting chips add-on.

- Mechanical ride motor base, control box, air bag and blower. Just add any multi-ride body!
